

The GCC white paper

Introduction

Gold has long been an investment vehicle. It is a valuable and independent resource, not limited to any country or trading market, and it is not associated with companies or governments. As a result, investing in gold can often help investors avoid problems that can occur in an economic environment, and it is one of the least taxed investments in the world.

As is known to all, gold has the dual properties of commodity and currency. Nowadays, with the continuous development of the financial market, gold as an investment has been recognized by more and more investors.

There are many kinds of gold investment, gold stocks, gold funds, gold financial accounts, gold investment is a permanent, timely investment. For thousands of years, gold has always been radiant, charming, and with its unique characteristics - not deteriorated, easy to circulate, value preservation, investment, value storage function as people's first choice for the preservation of assets. No

matter how history changes, the power of states changes, or currencies change, the value of gold remains forever.

1.What is GCC

Gold Change Coin, or GCC, is a new digital Gold cryptocurrency based on blockchain technology.

2.The birth background of GCC

As is known to all, nothing is engaged in what kind of deal, there are more or less problems, transaction security, timeliness, transactions, and many other problems, so a new gold trading pattern is born, combines the original gold trading block chain technology of the birth of the new encryption currency (GCC) good solve many problems in the existing trading mode, block chain decentralization can well solve the problem of security in the deal, encryption currency can be converted into USDT or BTC at any time, so there is no transaction timeliness, encryption monetary special way to trade is also very good to evade the issue of tax.

3.GCC market Prospect

BTC from its birth to now, has experienced 11 years, in recent years, the market value of all kinds of encryption currency rising,

half a year's time, the price of the BTC has more than doubled, which fully indicates encryption monetary gold in the current various transaction status, the GCC is similar to a replacement for gold trading, encryption relative to other currencies, the broader market, the market price is more stable, greater appreciation of space, more flexible trading mode.
